INTERNSHIPS

CYBER SECURITY – PROMPT INFOTECH July 2025

LDB Tool (Load & Deception Balancer)

Technologies: Python, Bash Scripting, Network Analysis, Log Parsing

Developed an automated security analysis tool to classify and profile network traffic. The tool processes target lists through a custom script, analyzing responses to determine the nature of a service—identifying if it is a standard web application (HTTP-based), a hybrid service, or a non-web application protocol. The architecture, centered around a target file, analysis script, and a results file, enhanced the efficiency of security assessments by providing quick, automated triage and improving situational awareness for penetration testers.

PROJECTS

1. Voice Assistant using Python:

A Python-based voice-activated assistant that listens to user commands, processes them, and provides responses or actions, tailored to recognize the user's voice for personalized interactions.

2. Cybersecurity Framework for Rural Digital Banking:

A lightweight cybersecurity system designed to secure rural digital banking transactions using OTP-based authentication and rule-based fraud detection. It ensures safe, low-bandwidth operations with support for low-end devices and limited internet connectivity.

3. IoT Network Sniffer:

An ESP32-based system that monitors Wi-Fi traffic in real-time to detect unauthorized devices within a network. It uses promiscuous mode and MAC address filtering to identify intrusions and employs Telegram integration for instant security alerts. The design ensures stable, queued message handling and safe multitasking for reliable performance.

CERTIFICATIONS

Introduction to Python – Sololearn	2023
C for Everyone: Programming Fundamentals – Coursera	2024
Cyber Security and Privacy – NPTEL	2024
Full-Stack Development – Simplilearn	2025
Ethical Hacking – NPTEL	2025
Cryptography and Network Security – NPTEL	2026

ACHIEVEMENTS

Won First Place in **CTF Hackathon** (Inter College) 2024

Winner - First Position in Project-Based Learning for Web Development using Django at Tech Connect 2024, organized by Sri Eshwar College of Engineering, Coimbatore. 2024

[Leetcode](#) : Solved 200+ Problems | Global Rank: 798,491

[Hackerrank](#) : 3 Star C, 2 Star Java

[Skillrack](#) : Solved 1000+ problems

SKILLS

Tools - BurpSuite | WireShark | Maltego | Nmap

Programming - C | Python | Java

Core Concepts - DSA | DBMS | Operating System (Basics) | Computer Networks

Database - MySQL | MongoDB

OS - Linux | Windows

Web Technologies - HTML | CSS | JavaScript
