INTERNSHIP

MERN Stack Intern – Consensus Academy **2025**

Gained hands-on experience with MongoDB, Express, ReactJS, and NodeJS, enabling me to develop projects using the MERN stack. Additionally, I deepened my understanding of advanced HTML and CSS concepts, enhancing my front-end development skills.

Java Full Stack(Spring Boot + React) Intern– RamPex Technologies **2025**

Gained hands-on experience with Java, Spring Boot, ReactJS, and MySQL. I worked on building full-stack web applications, learning how to develop REST APIs, handle user authentication, and create responsive user interfaces.

PROJECTS

Attendance Monitoring System: Tech Stack: MERN Stack, Geofencing, Node-cron **2026**

Developed a full-stack Attendance Monitoring System using MongoDB, Express, React, and Node.js to streamline institutional attendance tracking. Implemented geofencing for location-based validation, secure JWT authentication with role-based access control, leave management, and analytics dashboards for real-time monitoring.

Energy Consumption Analytics System: Tech Stack: MERN Stack **2026**

Developed an Energy Consumption Analytics System using React, Express, MongoDB, and Node.js to streamline the tracking, visualization, and analysis of energy usage. Implemented secure login and role-based access control, allowing users to monitor their personal energy consumption patterns. Admins and Super Admins can manage users, access advanced analytics, and view aggregated system data through interactive dashboard charts.

HireMetric: Tech Stack: NLP, Machine Learning **2025**

Developed HireMetric, a smart hiring system to automatically analyze resumes, apply NLP and Machine Learning to extract candidate details and accurately match them with job requirements, and provide automated shortlisting to help recruiters select the most suitable candidates efficiently.
